EXPERIENCE

AMNIL Technologies Pvt. Ltd.

3 Months

Web Development Intern

Kathmandu, Nepal

- Collaborated with cross-functional engineering teams on technical research, project documentation, and presentations
- Maintained responsive web interfaces using **React** and **Next.js** to support internal technology development initiatives
- Utilized version control systems like **Git** and **GitHub** to manage and track project codebases with high precision

WorldLink Communications Ltd.

5 Months

Network Operations Intern

Nepal

- Gained extensive hands-on experience in **LAN setups**, router and switch configuration, and enterprise Wi-Fi solutions
- Deployed next-generation **Wi-Fi 6 infrastructure** to ensure optimized client delivery and endpoint configurations
- Conducted strategic site visits to core network and server locations; diagnosed and successfully resolved technical connectivity issues

PROJECTS

GoodForAll | *College Project*

- Built a comprehensive donation platform connecting donors and recipients via location-based services
- Designed an intuitive user interface for posting, browsing, and managing all categories of donations
- Implemented real-time request notification systems alongside automated pickup scheduling features

Bytes Pedia | *College Project*

- Engineered user accounts and a community-driven framework to support active content sharing
- Created a centralized platform dedicated to sharing study materials, notes, and academic exam questions
- Prioritized a clean UX layout to ensure fast, easy, and reliable access to localized academic content

Tweet Nepal | *Self-initiated Project*

- Developed a simple micro-blogging application designed to post and share personal thoughts seamlessly
- Implemented user engagement features allowing individuals to like, comment, and add personalized notes
